

1) Развернут кластер - 2 балла (в подтверждение - скинуть в чат скриншот главной страницы Cloudera Manager)

2) Создана таблица в Hive - 2 балла (в подтверждение - скинуть скриншот результата SELECT-запроса к этой таблице)

The screenshot displays the Apache Hue web interface in a browser. The address bar shows the URL `35.238.101.174:8888/hue/editor?editor=3`. The interface includes a sidebar on the left with a 'Tables' section listing the 'athlete' table. The main editor area contains a Hive SQL query that has been executed successfully. The query is as follows:

```
1 CREATE EXTERNAL TABLE athlete (  
2   ID INT,  
3   Name STRING,  
4   Sex STRING,  
5   Age INT,  
6   Height INT,  
7   Weight INT,  
8   Team STRING,  
9   NOC STRING,  
10  Games STRING,  
11  'Year' INT,  
12  Season STRING,  
13  City STRING,  
14  Sport STRING,  
15  Event STRING,  
16  Medal STRING  
17 )  
18 STORED AS PARQUET  
19 LOCATION '/user/cloudera/athlete'  
20
```

Below the query editor, a green success message is displayed: `✓ Success.`. At the bottom, the 'Query History' section shows the executed query with a timestamp of '11 minutes ago' and a green checkmark.
